

TrulyMobile Solutions

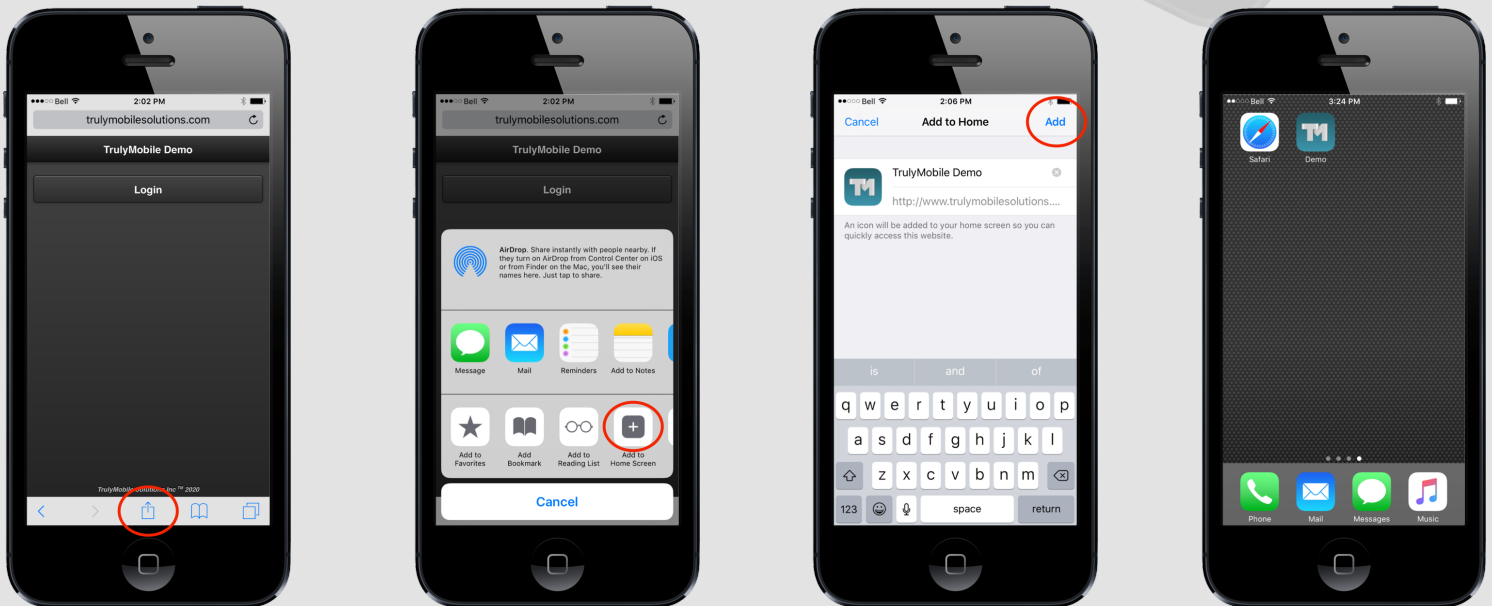

TrulyMobile SCADA ClientTM

OPC-to-Smartphone Solution for Industrial Scale Applications

The TrulyMobile SCADA smartphone client may fool you the first time you see it. You will not find it in the Apple App store, Google Play, the Windows Store or even BlackBerry World. This is for good reason...it's not an app! The TrulyMobile Scada client was implemented using HTML5 and JavaScript which offers the flexibility of viewing your 'application' on just about any device imaginable! HTTPS authentication can be enabled to secure your data from prying eyes. No more app store upgrades. You always receive the latest version at the time you connect.

Adding TrulyMobile SCADA to your phone's desktop iOS/Safari

Android/Chrome
